

# Our Operations

## Overview

Nine Point Energy (NPE) is a private exploration and production company focused on value creation through the safe, efficient development of oil and gas assets within the Williston Basin.

NPE executed a continuous single rig development program in 2018; resulting in a 21% increase in net production relative to FY 2017.

The Nine Point Energy team is committed to translating operational effectiveness into capital efficiency. Recent well results have bested historical record performing wells' production on a 30-day

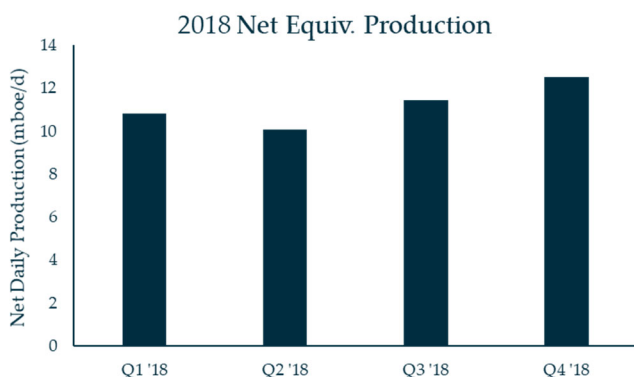

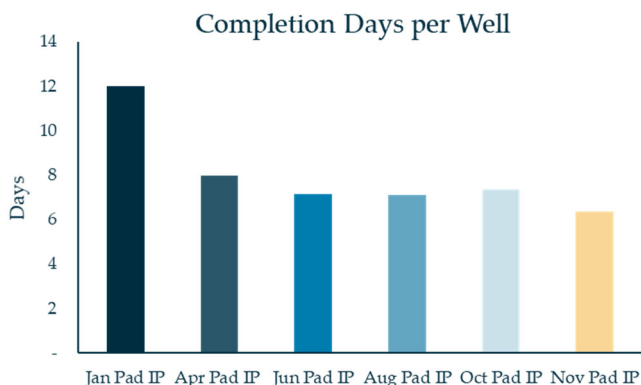

cumulative basis. Concurrently, drilling and completions times continue to trend down allowing NPE to get barrels to market sooner increasing IRRs.

As a result of operational efficiencies, strong well results, and capital discipline, NPE is achieving faster payback periods and minimizing outspend.

2018 results have created a strong platform for further growth in 2019 and beyond.

NPE will continue to focus on operating within cashflow and unlocking value for our stakeholders.

## 2018 Operational Highlights

- Increased production 21% relative to 2017
- Drilled 21 gross (16.9 net) wells
- Completed 21 gross (16.0 net) wells
- Drilling and completion days per well have continuously trended down in 2018
- Throughout 2018, NPE continued to refine stage count, proppant loading, and fluid volume to optimize reservoir stimulation
- Recently completed wells outperformed historic record wells on a 30-day cum. basis
- NPE is recognized as completing the best performing wells in the western portion of the basin
